

DINESHKUMAR S

Front-End Developer | AI & Python

+91 7010957511 | dineshkumar13042005@gmail.com | Coimbatore, India

CAREER OBJECTIVE

Motivated Front-End Developer with a B.Sc. in Computer Science (Artificial Intelligence) and a strong foundation in HTML, CSS, JavaScript, React JS, and Next.js, complemented by hands-on Python and data science experience. Passionate about building responsive, user-friendly web applications and solving real-world problems through code. A quick learner with strong analytical, problem-solving, and teamwork skills, seeking to contribute, learn, and grow as a Software Developer.

INTERNSHIP

Front-End Developer Intern — Adhoc Software | Aug 2026 – Sep 2026

- Gained hands-on experience in front-end web development using HTML, CSS, and JavaScript to build responsive, user-friendly interfaces.
- Learned and applied React JS to build reusable components and manage application state effectively.
- Learned Next.js for building fast, SEO-friendly, server-rendered React applications.
- Collaborated on real-world tasks, strengthening problem-solving skills and understanding of modern front-end development workflows.

EDUCATION

- B.Sc. Computer Science (Artificial Intelligence) — PPG College of Arts and Science, Bharathiar University, Coimbatore | Aggregate: 77% | 2023 – 2026
- Higher Secondary Certificate (HSC) — Government Higher Secondary School, Kovilpalayam, Coimbatore | Score: 56% | 2023
- Secondary School Leaving Certificate (SSLC) — Achievers Academy Matric Higher Secondary School, Hosur | 2021

TECHNICAL SKILLS

- Programming Languages: Python
- Web Development: HTML, CSS, JavaScript, React JS, Next.js
- Software & Tools: MS Word, Excel, PowerPoint, Jupyter Notebook

PROJECTS

Driver Drowsiness Detection System

Built a real-time driver drowsiness detection system to improve road safety, using Python, OpenCV, and facial landmark detection to track eye movements. Calculated the Eye Aspect Ratio (EAR) to detect signs of drowsiness and triggered an alert when the driver's eyes remained closed beyond a set threshold, helping reduce the risk of accidents.

End-to-End Machine Learning Pipeline with Streamlit Deployment

Developed a complete machine learning pipeline covering data preprocessing, feature engineering, model training, evaluation, and prediction. Built an interactive Streamlit interface enabling users to upload data and view real-time prediction results, and deployed the application end-to-end for an efficient, user-friendly experience.

CERTIFICATIONS

- Internet of Things Using Arduino — NoviTech
- 15+ Certifications in Digital Marketing — Great Learning Academy
- Machine Learning using Python — Simplilearn
